AMBUJ DUBEY

PROFILE

Dedicated and efficient full stack developer with 4.8+ years of experience in application layers, presentation layers, and databases. Certified in both Front-end and Back-end technologies. Having hands-on experience designing, developing, and implementing applications and solutions using a range of technologies and programming languages. Played major role with technologies like HTML, CSS, JavaScript, JQuery, Bootstrap, Materialize CSS, ReactJS, React Native, NodeJs, Strapi, EJS, Php Core, MongoDB, MySQL and MsSQL.

I prefer challenges that require me to work on projects in which I have to work outside my comfort zone and knowledge set. Learning new languages and development techniques are important for me as well as my organizations growth. I worked with AWS, Azure, Heroku, Digital Ocean and others cloud services skillfully.

Backend Technologies - Node.js, Express.js (Server-Side JavaScript Framework), Strapi, PHP.

Database Technologies - MySQL (RDBMS), MongoDB.

Operating System - macOS, Linux, Windows Operating System.

Tools Used - WebStorm, Sublime, Atom, Eclipse, GitHub, GitLab, Bitbucket, Visual Studio Code, DbVisualizer, FileZilla, Postman, Mongodb Compass, OpenVPN, Forticlient.

Communication Tools - Trello, Clockify, Dropbox, Pivotal Tracker, Slack, Google Drive, Mattermost, EchoHQ, Discord, NPM, Yarn & NVM.

Others Skills – Single sign out (oAuth), Google Authentication, Payment gatway (stripe), Webhooks implementation, MLab, Heroku Platform, Web-Hosting, Mocha Unit test, Database Caching, Database Catalog, Redis, Wordpress CMS Hosting, Nodejs Monolithic and Microservices based Architecture.

PROJECTS

Project Title:	Game reporting
Duration:	8 Months
Technology:	React Native, MSSQL, EXPO, Android App, IOS App, Azure. SSO and SMS API integration
Project Description:	This is a mobile application for reporting a bird hunting game.
Role:	Full stack software developer.

Project Title:	Bail Management system (BMS)
Duration:	Aug 2018(Present)
Technology:	HTML, CSS, Java Script, JQuery, MSSQL Server, Bootstrap, DataTable, NodeJS, Strapi. Azure, Azure Function, Scheduled Notification, Corp Authentication
Project Description:	Tool provides platform as a single point of access to Datasets in open format published by Ministries/Departments.
Role:	Full stack software developer.

Project Title:	Open Data portal
Duration:	Aug 2018(Present)
Technology:	HTML, CSS, Java Script, JQuery, MSSQL Server, Bootstrap, DataTable, NodeJS, Strapi.
Project Description:	Tool provides platform as a single point of access to Datasets in open format published by Ministries/Departments
Role:	Full stack software developer.

Project Title:	BDA project
Duration:	2 years
Technology:	HTML, CSS, Java Script, JQuery, Java, AngularJS, AWS Redshift Nodejs, MySQL, Bootstrap, JUnit test, D3 JS, C3 js , Echarts JS, Apache Spark, AWS RDS, Shell Script, Data Visualizations, Heroku.
Project Description:	Tool provides an easy to use analytics platform for users to ingest, clean, prepare and analyze data with visualizations, and help to create reports.
Role:	Full stack software developer.

Project Title:	Track And Trace Project
Duration:	2 years
Technology:	HTML, CSS, Java Script, JQuery, MySQL, Bootstrap, DataTable, NodeJS, Java, Scheduled Jobs (CronJobs), excel sheets, Node-Mailer, AWS Elastic Beanstalk, Nginx.
Project Description:	Tool provides higher level of tracking system of individual shipments and creates a detailed dashboard also send alert when status of shipment gets changed.
Role:	Full stack software developer.

Project Title:	Mobibuzz project
Duration:	4 Months
Technology:	HTML, CSS, Java Script, JQuery, MongoDB, Node.js, Bootstrap.
Project Description:	This project helps to track employee login, logout time, employee detailed profile, it consist Leave Management system and it also track employee status and company events.
Role:	Front end developer.

Project Title:	KnoahsARK 360
Duration:	5 Months
Project Description:	KnoahsARK enables client to manage the entire customer contact center environment by integrating locations, staff, departments, tools, data points and processes to give you one view towards making better decisions
Role:	Front end developer.

Project Title:	VHT project
Duration:	7 Months
Project Description:	VHT use to recognized the severity of customer frustration in relation to delivering exceptional customer service. This led to inventing a patented solution, VHT Callback, which eliminated wait time while increasing customer satisfaction.
Role:	Developer (Language Method and grammar Developer, tested method by using JUnit test cases, Automate entire development by using Cucumber and ruby and run it into Jenkins).

Project Title:	ITI Jobs Portal project
Duration:	2 Months
Technology:	HTML, CSS, Java Script, JQuery, Nodejs, MySQL, DOM, AJAX, Json, Bootstrap4.
Project Description:	Tool provides ITI related database. Here, users can manage, store, share and disseminate information about placement, ITI collages, and its having high level monitoring.
Role:	Full stack software developer (End to end product development with Responsive Web Design by using Bootstrap4 framework).

Project Title:	Greenticks project
Duration:	2 Months
Technology:	HTML, CSS, Java Script, JQuery, Nodejs, MySQL, MongoDB, DOM, AJAX, Json, Bootstrap 4, Mocha unit test, Webpack, Wordpress4.7, MLab, Heroku.
Project Description:	Tool provides computer based online exam details along with Invigilator details and track daily report.
Role:	Full stack software developer.

Project Title:	Aerotic Project
Duration:	2020(present)
Technology:	HTML, CSS, Java Script, JQuery, Core PHP, MySQL, DOM, AJAX, Json, Bootstrap 4.
Project Description:	Tool provides product details and also generate daily invoices. It also provide reminder for the customer.
Role:	Software developer.

Project Title:	Harshuj
Duration:	2020(present)
Technology:	HTML, CSS, Java Script, JQuery, Core PHP, MySQL, Composer, DOM, AJAX, Json, Materialize-CSS, Digital-Ocean.
Project Description:	Tool provides one destination for many applications like contacts, reminders, to-do-list, useful weblinks, notes, feedback etc.
Role:	Full stack software developer.
